AltaML

Transform Data Into Action >>>

Harness the power of your data with artificial intelligence

As an industry-leading developer of software solutions powered by machine learning (ML), AltaML works with organizations that want to use data-driven tools to develop solutions that improve operational efficiency, reduce risks, and generate new sources of revenue.

Trusted Partner from Ideation to Iteration

Starting with a deep understanding of organizational challenges, AltaML develops customized solutions encompassing the entire ML lifecycle, from envisioning possibilities and piloting solutions to putting code into production and evolving models over time. With extensive experience across multiple industries and deep ecosystem relationships, AltaML's proven AI methodology leads to faster results, better outcomes, and innovative solutions to solve real-world challenges and unlock value for partners.

Offerings

Feasibility Assessment

Validate ML use cases, prioritizing based on feasibility and business value, resulting in 70%+ of successful use cases put into production

Applied AI Lab

Structured and efficient process for rapidly taking AI opportunities from ideation to operational, enabling partners to pursue high-value opportunities and build internal AI capabilities through cross-functional teams with deep ML expertise

Catalog of Opportunities

An eight-week engagement to evaluate organizational objectives, generating a catalog of prioritized AI/ML use cases aligned with strategy, providing a roadmap for unlocking long-term value

Managed Services

Simplifies AI/ML product maintenance, enhances reliability and performance, and offers customized monthly plans covering model performance, troubleshooting, cloud solution maintenance, and feature backlog management
